Interleaved 2 of 5 (ITF)

Enable/Disable Interleaved 2 of 5
To enable or disable Interleaved 2 of 5, scan the appropriate bar code below, and select an Interleaved 2 of 5 length from the following pages.

*Enable Interleaved 2 of 5

Disable Interleaved 2 of 5
Set Lengths for Interleaved 2 of 5

The length of a code refers to the number of characters (i.e., human readable characters), including check digit(s) the code contains. Lengths for I 2 of 5 may be set for any length, one or two discrete lengths, or lengths within a specific range.

**One Discrete Length** - This option allows you to decode only those I 2 of 5 symbols containing a selected length. Lengths are selected from the numeric bar codes beginning on page D-1 in Appendix D. For example, to decode only I 2 of 5 symbols with 14 characters, scan I 2 of 5 - One Discrete Length, then scan 1 followed by 4. If you make an error or wish to change your selection, scan Cancel on page D-5.

**Two Discrete Lengths** - This option allows you to decode only those I 2 of 5 symbols containing either of two selected lengths. Lengths are selected from the numeric bar codes beginning on page D-1 in Appendix D. For example, to decode only those I 2 of 5 symbols containing either 2 or 14 characters, select I 2 of 5 - Two Discrete Lengths, then scan 0, 2, 1, and then 4. If you make an error or wish to change your selection, scan Cancel on page D-5.
Set Lengths for Interleaved 2 of 5 (continued)

Length Within Range - This option allows you to decode an I 2 of 5 symbol with a specific length range. The length range is selected from numeric bar codes beginning on page D-1 in Appendix D. For example, to decode I 2 of 5 symbols containing between 4 and 12 characters, first scan I 2 of 5 - Length Within Range. Then scan 0, 4, 1, and 2 (single digit numbers must always be preceded by a leading zero). If you make an error or wish to change your selection, scan Cancel on page D-5.

Any Length - Scanning this option allows you to decode I 2 of 5 symbols containing any number of characters within the scanner capability.

Note: Due to the construction of the I 2 of 5 symbology, it is possible for a scan line covering only a portion of the code to be interpreted as a complete scan, yielding less data than is actually encoded in the bar code. To prevent this from happening, it is recommended that specific lengths (I 2 of 5 - One Discrete Length - Two Discrete Lengths) be selected for I 2 of 5 applications.
